

2024 KPP ENHANCED FARM TRACTORS

All rules stated above for 2024 KPP Farm Stock Tractors apply with the addition of the following:

1. **Fenders are REQUIRED for 9,500 to 15,500**
2. All tractors must be equipped with a hand operated, spring return (deadman) throttle. Proper operation will be checked during inspections.
3. **Wheelie bars are required on all tractors:**
 - Pads on bottom of bars to be a minimum of 5 inches square.
 - Pads to be a minimum of 32 inches rearward from the center of the rear end housing.
 - Pads maximum of 10 inches off the ground.
 - Wheelie bars and hitch may not be connected
 - Outside to outside of wheelie bar pads to be a minimum of 20 inches
 - Wheelie bars must support the weight off the tractor for the weight class being pulled.
4. All tractors must be equipped with a seat belt (lap belt).
5. All tractors must have a factory style R.O.P.S. (roll over protection system)
6. All spark ignition tractors must have a working kill switch.
Diesel Tractors Must have an air shut off in the form of a flapper over the intake or guillotine. All shutoff will be tested during inspections.
7. Classes 5,500lb., 6,500 lb., 7,500lb. that pull 4.1 m.p.h. and over = Enhanced
8. Classes 9,500lb. 11,500lb., 13,500lb., 15,500lb. That pull 8.1 m.p.h. and over = Enhanced
9. Enhanced farm tractors can compete in no more than two (2) classes with that particular tractor. The number of hooks is subject to change due to time constraints, puller turn-out, weather conditions, etc.
